## REPORT BY THE DIRECTORS

OF THE

## DUNDEE ROYAL LUNATIC ASYLUM

TO THE

### ANNUAL GENERAL COURT,

18TH JUNE 1894.

In submitting their Seventy-fourth Report, the Directors are glad to state that the Dundee Asylum is in a prosperous position.

Under the powers granted to them by the last Annual Court of the Directors, the Committee of Management have feued since last Annual Court a lot of ground at Baldovan Terrace, extending to fully 32 poles. Another offer to feu is presently under the consideration of the Committee.

In February last the Committee of Management, acting under the remit made to them by last Annual Court, sold the superiorities of five lots of ground for £4,291, being fully twenty-nine years' purchase. The price of the feu-duties, less the expense of transfers, was paid into the Union Bank towards the reduction of the debt due to the Bank on Building Account. In last year's Report it was stated that the balance due on this Account was £30,725. 9s. 8d. It now stands at £25,543. 0s. 7d.

During the year a sum of £55 was received from the Trustees of the late Mr William Nicoll, being a contribution from the residue of Mr Nicoll's estate, allocated by his Trustees to the Asylum.

In August last Miss Aitken was appointed Head Female Attendant, in place of Miss Caygill resigned.

Various alterations and improvements have been made on the Asylum during the year. The new boiler referred to in last year's Report has been erected. The corridors near the entrance, which were formerly somewhat cold in winter, have been heated with hot-water pipes, which has added greatly to the comfort of the patients. The hot-water pipe has also been carried through the store, which is now much warmer and more comfortable than it was. As recommended by Dr. Rorie, the partitions of the paralytic dormitories and single rooms of one of the male wards have been removed; a new clothes' boiler has been procured for the laundry; and the old farmsteading has been taken down.

The financial position of the Asylum continues to improve. In addition to the £2000 paid to the Union Bank from the ordinary Revenue the sum of £4,242 1s. 9d., being the net proceeds of the Feu-duties sold, has been lodged with the Bank towards the reduction of the Building Debt.

From the Treasurer's Report it will be observed that the Income of the Institution from the Board of Patients, &c., for the year was £13,185 2s., and the Expenditure £13,390 5s. shewing an excess of Expenditure of £205 3s.

The Commissioners in Lunacy visited the Asylum in March last, and they report favourably on the Institution.

The House Visitors have also frequently visited the Asylum, and their reports bear testimony to the good order in which

everything is kept at Westgreen, and to the care and attention of the officials there.

The Medical Superintendent's Report shews that on 19th June last there were 386 patients in the Asylum, 157 males, and 229 females, while there are at present 416, that number being made up of 177 males and 239 females, 180 having been admitted during the year, 67 having recovered, 35 having died, 13 having been removed to the Lunatic Wards of Poorhouses, 13 to other Asylums, 11 by friends, 4 by minutes of Parochial Boards, 4 by escape, and 3 by lapse of Emergency Certificate.

#### AT THE

#### ANNUAL COURT OF DIRECTORS

OF THE

## DUNDEE ROYAL LUNATIC ASYLUM,

#### HELD IN THE TOWN HALL OF DUNDEE,

ON MONDAY, 18TH JUNE 1894,

#### CAPTAIN CLAYHILLS HENDERSON IN THE CHAIR:

The Secretary read the Annual Report of the Directors.

Captain CLAYHILLS HENDERSON moved that the Report now read be adopted as the Seventy-fourth Report of the Institution, which was agreed to.

Dr. Rorie read the Medical Report.

It was resolved that the Annual Report of the Directors, such portions of the Medical Report as may be selected by the Committee of Management, and the Abstract of the Income and Expenditure for the past year, be circulated as usual.

## MEDICAL REPORT.

18TH JUNE 1894.

At the date of last Annual Meeting the number of patients resident in the Asylum was 386, of whom 157 were males and 229 females. Of these, 78 were private cases, 38 males and 40 females; and 308, namely, 119 males and 189 females, were paupers.

180 cases have been admitted during the year, namely, 88 males and 92 females. Of these, 19 were private patients, the expense of whose maintenance was defrayed by relatives or friends; and 161 were patients whose maintenance was defrayed by public funds, and who were sent from, or afterwards found chargeable to, the following parishes, namely:—Dundee, Kettins, Kirriemuir, City Aberdeen, City Glasgow, Barry, Rattray, Blairgowrie, Kinfauns, Glamis, Montrose, Monifieth, Lintrathen, Mains and Strathmartine, Kingoldrum.

The total number under treatment during the year has therefore been 566 in all, being 18 in excess of the number for last year.

Of these, 67 have been discharged recovered, namely, 29 males and 38 females, 10 being private and 57 pauper patients; 6 males and 7 females, being principally pauper patients chargeable to parishes beyond Forfarshire, were transferred to other Asylums; 4 were removed by Minutes of Parochial Boards; 11 by friends, more or less improved; 13 were transferred to Lunatic Wards of Poorhouses; 4 discharged by escape; 3 by lapse of Emergency Certificate; and 35 have died, of whom 14 were males and 21 females.

There remain therefore at the present date 177 males and 239 females, total 416.

The proportion of recoveries calculated on the number admitted is consequently 37.3 per cent., while that of the deaths calculated on the whole number under treatment is 6.18 per cent.

The number of patients brought to the Asylum from other public Institutions continues still to be considerable; thus 11 were transferred from other Asylums, and 5 from the Lunatic Wards of Poorhouses; 10 were received from the ordinary Wards of Poorhouses; 10 from the Police Office; 3 from the Dundee Prison; and 3 from the Infirmary.

As regards the mental condition of the patients on admission, 27 were found to be suffering from melancholia; 40 from dementia; 56 from various forms of mania; 41 from monomania; 3 from idiocy; 13 from general paralysis; and 1 from moral insanity.

Physically, 82 were in a fair state of health; 44 were more or less frail; and only 54 were in good health. The number of aged persons now sent to the Asylum continues to be a marked feature of the admissions. During the past year, 12 of those admitted were over 60 years of age; and of these, 2 were over 70 years.

As already stated, the obituary register contains 35 entries, referring to 14 males and 21 females. In 10 instances death was due to organic brain disease, in 6 to epilepsy, in 3 cases from senile decay, and in 2 cases each, from cancer of the liver, general paralysis, phthisis, and enteritis; and in one case each, accidental injury to chest, marasmus, obstruction of bowels, pneumonia, cerebral hæmorrhage, syncope, anæmia with heart disease, cerebral tumour, and asthma with pericarditis led to the fatal result.

Of the patients who died, many had only been a short time in the Asylum, several being received in a paralytic and moribund condition. Five were admitted since the beginning of the present year; 13 had been admitted in 1893; 6 in 1892; 3 in 1891; and 2 in 1887, 1880, 1869, and 1848 respectively.

16 had passed their 50th birthday; and of these, six were between 60 and 70 years of age, one 77, one 78, and one had reached her 84th year.

Post-mortem examinations continue to be made when the consent of the relatives can be obtained, and during the past year were done in 31 instances.

The statistics as to recoveries again confirm what I have formerly said, namely, that the greater part of those who leave the Asylum recovered, do so within three years of their admission; thus, of the whole number, 19 had been under treatment for various periods under 3 months; 19 were under 6 months; 9 under 9 months; 4 under one year; 12 from 1 to 2 years; 2 from 2 to 3 years; and 2 from 3 to 4 years.

The extension of accommodation for the better class of patients will be most efficiently and at the same time most economically met, partly by the erection of a special building for exceptionally difficult cases, quite apart from, and yet within easy access of, the present Institution, and partly and chiefly by the purchase or lease of any suitable buildings in the neighbourhood which may be got available for the purpose, and where the patient could secure greater privacy, and enjoy more fully those home-like comforts, which can only to a limited extent be introduced into a large public Institution. Were this carried out, the accommodation at present occupied by the private patients would then be available for the object for which it was originally erected, namely, to meet the gradual accumulation of the poorer patients; for a pretty steady increase in our numbers from this class must be looked for, even after fully discounting the relief that may be afforded by the removal of the quieter and more manageable cases; for experience has now fully shown that not more than 25 per cent. of an average insane population can be disposed of in the Lunatic Wards of Poorhouses, and that no larger percentage can be boarded out in private families without endangering public safety,

Hitherto in the present building, the treatment and wants of the patients have been satisfactorily secured and provided for, but it must not be forgotten that much has still to be accomplished, and a considerable outlay incurred, before the Institution can be regarded as thoroughly equipped, or can be maintained in keeping with the views and requirements of the day, and especially as a curative Hospital, for such it is every year becoming more and more. has been now frequently pointed out, the changes in the population for some years back have been exceptionally active, virtually amounting to a renewal of the patients about every second year, and consequently the tear and wear have been very great. Again, much of the furniture is becoming worn out and antiquated; the concrete floors and fittings of the bathrooms, lavatories, &c., are not in keeping with modern ideas; and the cooking arrangements will soon require revision. The erection of a separate Chapel, and the introduction of the electric light, although not absolutely necessary, are also matters deserving early and earnest attention.

In conclusion, I have only to remark that the general work of the Institution makes steady and satisfactory progress; the appointment of the clinical assistants continues to be fully taken advantage of, three having been resident at one time during the autumn months. The usual lectures to the nurses and attendants were resumed during the winter, and instruction in sick-room or invalid Cookery was appended to this course, and was a source of much interest. The Pathological Museum is steadily developing, and a number of new works on mental and nervous diseases and allied subjects has been added to the Medical Library.

The Farm of Whitelawston has proved a valuable addition as means of occupation for the patients, and erelong I hope will also prove a source of profit to the Institution.

The amusements, entertainments, &c., have been of much the same character as in former years. In the course of the summer months picnic parties visited the Den of Airlie, Kinnaird Castle, Monikie, and Lundie Lochs; and in winter the usual balls and

dancing parties took place; various concerts were given by St. Stephen's Choir, Broughty Ferry Choral Union, and the Dundee Scottish Musical Society, and in addition to the usual Christmas entertainments a pleasing variety was introduced by a series of Tableaux Vivants, and a musical entertainment, given by the Gymnasium Bazaar Company. To the ladies and gentlemen who have on these and on so many previous occasions contributed to the amusement of the patients our best thanks are again due.

JAMES RORIE, M.D., L.R.C.S.E.

#### RATES OF BOARD.

The following are the present Rates of Board, subject, however, to such alterations as the Directors shall judge proper, which must necessarily vary according to the state of the funds and the expenses of the establishment. The Board in all cases must be paid quarterly and in advance. Before the entry of a Patient, the Board to be paid up for one quarter.

#### I. FOR PRIVATE PATIENTS.

First Class - -  $\pounds 25$  0 0 per Annum. Note.—This rate is only for special cases, admitted by authority of the Directors.

 Second Class
 £40
 0
 0 per Annum.

 Third Class 60

# II. For Pauper Patients (including Clothes, &c.) 11/· to 12/6 per week.

When a Patient is admitted, one Quarter's Board, as fixed by the Directors, shall be paid in advance to the Medical Superintendent, and afterwards in advance quarterly to the Treasurer, on the 1st day of January, the 1st of April, the 1st of July, and the 1st of October. No part of any payment in advance, except in the case of paupers, shall be returned, except in special cases, to be judged of by the Committee of Management; and if any Patients who have been removed shall return to the Asylum, they shall be admitted in the same manner as if they had never been in the Asylum, and pay accordingly.

The Patients shall have no claim to remuneration for work done.

Ladies and Gentlemen requiring the benefit of the Institution can be accommodated with commodious apartments, distinct from the other Patients, with a servant if required.
